PROJECTS

Covid-19 Tracker | GitHub: https://github.com/Lagbana/covid19-tracker **| Deployed Project:** https://lagbana.github.io/covid19-tracker/

The Covid-19 Tracker retrieves, displays, and visualizes covid-19 related data. The application also retrieves and displays curated news from the New York Times API. My role was writing the code for the news API, the code that fetches the covid-19 data, and designing the user interface. This project was completed using JavaScript, HTML5, Materialize CSS, CSS, and Charts.js.

Weather Dashboard | GitHub: https://github.com/Lagbana/weather-dashboard **| Deployed Project:** https://lagbana.github.io/weather-dashboard/

The weather dashboard provides today's and the 5-day weather forecast of a searched city. This was an individual project and it was completed using HTML5, CSS, Bootstrap 4, and JavaScript.

Workday Scheduler | GitHub: https://github.com/Lagbana/workday-scheduler **| Deployed Project:** https://lagbana.github.io/workday-scheduler/

This work-day scheduler allows a user to input and save agenda items. Hours are color coded for past, current, and future time. This was an individual project and it was completed using HTML5, CSS, Bootstrap, and jQuery.
